

Installation Sketch: Round Surface-mounted Dial Panel

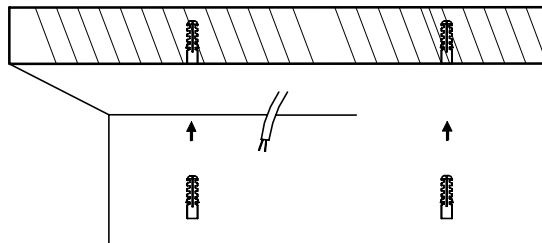

1、 Before installation, turn off the main power supply to ensure the luminaire is not live, and locate the reserved wires on the ceiling.

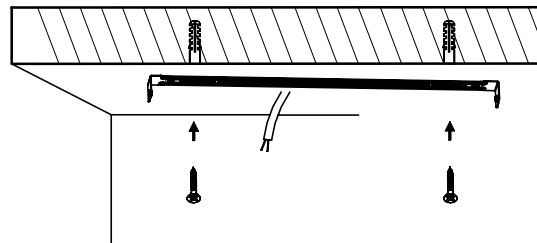

2、 Confirm the mounting position of the bracket (near the reserved wiring position on the ceiling).

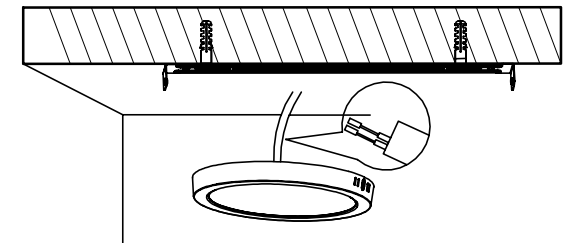

3、 Drill holes.

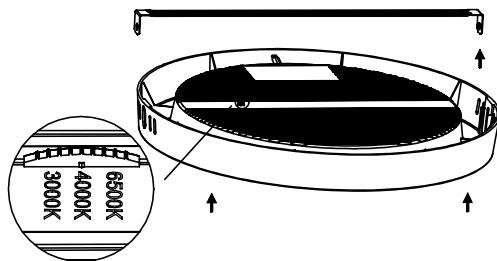

4、 Insert expansion bolts.

5、 Secure the bracket to the ceiling with screws.

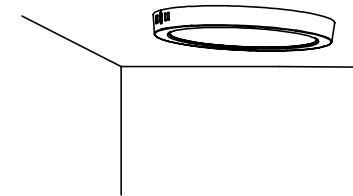

6、 Connect the luminaire to the reserved wires.
Installation by a professional electrician is recommended.

7、 Align the base bracket mounting slot with the bracket, insert the bracket into the slot, and fit the bottom of the lamp as close to the ceiling as possible. Select the color temperature before installation.

8、 Secure the lamp to the bracket with screws.

9、 Installation completed. Switch on the power supply.
